

AWS GAMEDAY

Secret Agent(ic) Unicorns!

Build, Deploy & Compete with AI Agents on AWS

A gamified, hands-on learning event where teams build and deploy intelligent AI agents using Amazon Bedrock — competing to solve complex challenges through agentic AI workflows, tool-use patterns, and autonomous reasoning.

DURATION

3–4 Hours

FORMAT

Teams of 3

DIFFICULTY

All Levels

COST

Complimentary

What You'll Learn

- Design AI agents that reason, plan, and execute multi-step tasks
- Connect agents to external APIs and services
- Implement responsible AI mechanisms
- Multi-agent orchestration for complex workflows
- Debug and fix misconfigured agents under time pressure

AWS Services Covered

- Amazon Bedrock
- Bedrock AgentCore
- Strands Agents
- MCP & A2A
- Amazon Q Developer
- OpenSearch Serverless
- DynamoDB
- Kiro CLI

WHO SHOULD ATTEND

Data Scientists • ML Practitioners • Solutions Architects • Developers
DevOps & SRE • Engineering Managers • Anyone curious about AI Agents

■ **September 11, 2026**

Seats limited | Teams of 3 | Sandbox AWS accounts provided

■ **Exciting Swags for All Participants + Special Prizes for Winners!** ■
